NUMBER 62.

# THE PORK RAISERS' TESTIMONY

W. F. Puffer, M.P.P., in Evidence Before Commission at Lacombe Declares He Knows of no Combine Among Porkers—Pork Raising Profitable

Staff Correspondence.

Lacomb, July 9.—The Beef Commission ended its work at Lacombe today and will open again at Regina tomorrow in the heart of the ranching country lying east of this place. During its session fifteen witnesses have been examined.

The problem before the commission here was that of the mixed farmer who has a cow and calf for sale each year. The district produced about \$100,000 worth of beef cattle last year, which represented the production of a great number of farmers. The chief complaint of the mixed farmer is like that of the rancher—the want of competition. They are unable to range the local market by the outside market, and the only market they know is the one fixed by B. Burns & Co. or Gordon, Ironsides & Co.

The hog raisers complain of the unsteadiness of the local market, when the price is put up by outside buyers. They claim that the price is put up by outside buyers to get a large stock in supply and then cut down the price.

They are to get the benefit of the farmers' sacrifice. The farmers are sanguine about the development of the pork industry in Alberta on a reasonable market. The only solution is the establishment of a pork packing house under government supervision to regulate and secure a safe value against the oppression of the monopolists. They are a steady market, they say, and there is no limit to the number of hogs that can be produced. The district is admirably suited for production of grain and the farmers have no objection to it. It is more profitable to convert their grain into beef or pork than to sell it as grain. There is only one small elevator in Lacombe, but there are dozens of live pork hogs. The cattle, beef steers and bacon hogs. Not all are the farmers' cattle, but the methods of buying adopted by the dealers are objectionable to the weight of their cattle for shrinkage. The witnesses generally objected to the practices and declared it was excessive.

The other side of the story was submitted by W. F. Puffer, M.P.P., who besides conducting his own meat market in the town of Lacombe, acts as agent for B. Burns & Co. Mr. Puffer declared the ground was not so much less number and indicated very emphatically that the dealers had no difficulty as well as the farmers. He explained very satisfactorily the complaint of the mixed farmer, who said that he had shown a greater shrinkage of 5 per cent. He said that the cattle was concerned, he stated, he would prefer to take the weight of an independent party rather than taking the weight of the dealer. He had been off at Lacombe during the years 1906, 1907 and this year by Mr. Puffer.

**Mr. Puffer Examined.**  
Mr. Puffer stated to the Commission that he had been engaged in the buying and selling of the cattle for retail meat and butchering business for the last twelve years, and was now from Wetaskiwin as far north as the Red Deer River. He began buying for B. Burns & Co. in 1906.

Mr. Nolan then went into a cross-examination of the witness, who had been paid at Lacombe during the years 1906, 1907 and this year by Mr. Puffer.

"What was the price in 1906?"  
"Well, the price was very much that I could not tell without an examination of my books."

"What was the highest?"  
\$2.75 per 100 pounds.

"Do you make any reduction for shrinkage when you buy?"  
"Yes, we generally make a reduction of 3 or 4 per cent."

Mr. Puffer then explained that the seller who lived at a distance from the shipping point would have to take his cattle to the shipping point, and the shrinkage was taken from the weight of the cattle and the price paid.

Mr. Puffer then explained that the shrinkage was taken from the weight of the cattle and the price paid.

Mr. Puffer then explained that the shrinkage was taken from the weight of the cattle and the price paid.

Mr. Puffer then explained that the shrinkage was taken from the weight of the cattle and the price paid.

Mr. Puffer then explained that the shrinkage was taken from the weight of the cattle and the price paid.

"I have been as far as possible equal in buying over spring and fall."

"Do you generally buy under contract for future delivery?"  
"Yes."

"Have you a contract with you?"  
"Yes."

The form was produced. These forms are supplied by B. Burns & Co. Mr. Puffer explained that usually the contract was made in July or August for delivery the following spring. The purpose of the contract was to equalize the supply and offerings to maintain a uniformity of price. A rule for many years was offered for sale in the fall. The Burns Co. made a great many carry over through the winter, but were unable to handle the quantity offered. They then contracted with the farmer to do the feeding, paying him the current price at the time of delivery on a price stipulated in the contract. This mode of carrying over was a success. The Burns Co. made a great many carry over through the winter, but were unable to handle the quantity offered. They then contracted with the farmer to do the feeding, paying him the current price at the time of delivery on a price stipulated in the contract. This mode of carrying over was a success.

"Who fixes the prices named in the contracts?"  
"The Burns Co. give instructions as to what price to pay."

"By having these contracts do you prevent the farmer from selling his cattle?"  
"Possibly. As far as the cattle contract is concerned, it does not prevent the farmer from selling his cattle."

Mr. Puffer then explained that the Burns Co. made a great many carry over through the winter, but were unable to handle the quantity offered. They then contracted with the farmer to do the feeding, paying him the current price at the time of delivery on a price stipulated in the contract. This mode of carrying over was a success.

Growers' Association and who receives a fee from the government, who is a more satisfactory if he were wholly employed and paid by the government, as many cattlemen who were not members of the Western Stock Growers' Association were dissatisfied.

"The Hog Industry."  
"Is there much pork raised here?"  
"Yes, I had for myself and when I have a car or I can sell them to B. Burns & Co."

"How do you know what to pay for these hogs?"  
"I know what Burns will pay."

"Is hog raising profitable for the mixed farmer?"  
"Yes, it is."

## USING EXPLOSIVE BULLETS IN WAR

Proposition at Peace Conference to Prohibit This Kind of Ammunition

The Hague, July 8.—The British Ambassador, Hagan, Dutch, and Spanish delegations to the peace conference today conferred regarding the proposed prohibition of the use of explosive bullets in war.

The subcommittee, to which was referred the subjects of arbitration and committees of inquiry, had a prolonged session today under the presidency of M. Bourgeois, France. The general subject was the prohibition of the use of explosive bullets.

The committee was divided into two sections, one for the prohibition of the use of explosive bullets, and the other for the prohibition of the use of explosive bullets.

The committee was divided into two sections, one for the prohibition of the use of explosive bullets, and the other for the prohibition of the use of explosive bullets.

No. 28 McDougall Avenue, two doors north of the Edmonton club, opposite Grand View Hotel.

Special attention given to handling freight, furniture and piano.

New Piano Model, New Piano Truck, Low Price Wagon.

We take full responsibility for damage to pianos and we satisfy our customers.

Proof: We have the largest trade in this line in the city.

Storage warehouse for all kinds of merchandise.

## STRATHCONA LOTS

## MANY BY LAWS WERE PASSED

To Issue Debentures by City of Strathcona for Work Now in Progress

The regular weekly meeting of the Strathcona city council was held last night with a bare quorum, consisting of the mayor and Aldermen Crawford, McKennie and Hulbert. After the reading of minutes a delegation was heard.

**Delegation Heard.**  
J. D. Hyndman, of Dawson & Hyndman, appeared before the board as the representative of Mr. Richardson, the former owner of Strathcona Place subdivision. Mr. Hyndman pointed out that the subdivision has been laid out some time ago and had practically all been sold. In blocks 14, 15 and 16 the total length was 600 feet instead of not more than 500 feet as the by-law provides.

Mr. Hyndman urged in view of the fact that the subdivision was an old one and the present owners of lots had built houses and made other improvements, that the council pass a special by-law ratifying the plans and thus permit the owner to grant a title, in doing which he was at present seriously handicapped.

In this connection Engineer McLennan's report on the city subdivisions was read. R. pointed out that lots number 3, 2 and the subdivisions of Strathcona Place and Richmond Park did not comply with the by-law relating to subdivisions.

The matter was discussed at some length. Mr. Sandeman being heard with reference to Richmond Park and it was agreed that the requests be granted and the gentlemen appearing before the council be asked to prepare special by-laws prepared. The first two lots not in accordance with the by-law will, it was decided, be dealt with at a later meeting.

**Communications.**

A letter and a telegram from the Shawnee Land Co., Revelstoke, B. C., with reference to adjustment of poles, which they said, were delayed owing to a change of freight and trouble in securing the lumber; and a telegram from the Galtie McCallum Co., with reference to their account, were ordered to be filed.

W. F. Lee, Winnipeg, wrote the council asking that the freight bills for sewer and water pipe received on his be returned. The secretary-treasurer was instructed to comply with the request.

A letter from M. S. Danlop, of the C. P. R., Montreal, appealed against the city assessment. The letter stated that the writer had been told of whether the C. P. R. actually owned all the land for which they had been assessed. The notice of appeal was for the purpose only of preserving the right of the company and if it was later found they owned the property and the assessment was reasonable, it would be paid. This letter was handed over to the city assessor.

John R. Laywell, solicitor for T. Smith, whose cows were impounded some days ago, wrote protesting against the alleged injustice and offering to settle the case without prejudice for \$20. Otherwise his client would ask as he should be advised. The letter was handed over to the city assessor.

A number of letters with reference to the sale of debentures for the May Anderson Co., the Wood Gundy Co. and others, were taken up and will likely be later discussed with closed doors.

Prof. Patton, a patent medicine vendor, asked the rate of license for selling free concrete in city.

O. Dignan, government inspector of meters, reported on a number he had examined for the city.

The Winnipeg Rubber Co., Calgary, asked that the contract which they had been awarded for Trojan buses be put in a new bus wagon, be forwarded.

A letter was also read from the C. P. R. enclosing the profile of the proposed line through the city to the high level bridge.

**Reports of Committees.**  
Ald. McKennie reported that the former owner of the building now being used for an isolation hospital wished the money in payment of the house.

A report from Engineer McLennan stated that the total cost of the granite walk along Whyte avenue on block 20 was \$1,000. There was a total length of 533 feet, a width of 15 feet, a superficial area of 8,000 square yards, and an average cost of \$2.16 per square yard.

He also reported that the subdivision on the northwest part of R. L. 15, completed with the by-law in relation thereto.

**By-Laws Passed.**  
A number of money by-laws were given their third readings. Ald. Crawford being in the chair, the committee. The by-laws were as follows:

To raise a temporary loan of \$5,000 for the purpose of the city's taxes.  
To raise a temporary loan of \$30,000 on account of the sewer construction system.

To issue debentures amounting to \$30,000.  
To raise a temporary loan of \$30,000 pending the issue of debentures.  
To provide for \$100,000 of local improvements, made on special rate of one cent in 1930-1931.  
To raise a temporary loan of \$10,000 pending the issue of debentures.

Also a by-law to amend the by-law with reference to the meter rates.  
The date of the meeting of the council revision was set down for Monday, July 22nd, at 2 p.m.

As Mr. McKennie gave notice of by-laws with reference to the registration of the subdivisions of Strathcona Place and Richmond Park. Council then adjourned.

## EDMONTON WANTS ELECTRIC POWER

Request From Edmonton City Commissioners Will Likely be Granted by Strathcona

For a considerable part of last year the city of Strathcona was supplied with electricity by the Edmonton plant, owing to the disabled condition of the former at that time.

This year the Strathcona plant is running in excellent shape with lots of surplus power, while Edmonton on the contrary is overtaxed or shortly will be owing to the growth of the city during the past year and the demand for light and power.

At last night's meeting of the Strathcona council the request of Edmonton was considered and it was decided to grant it should satisfactory arrangements be made.

The following is the letter submitted last night from Commissioner Geo. J. Kinnaird, of Edmonton:

"We have under consideration the extension of our electric light and power plant to meet the requirements of our city service during the coming winter. We have met with many and serious delays in carrying these intentions forward, and it is the likelihood of our not accomplishing this work in time to do so, that is causing the city part of the coming fall and winter."

## THE WEST ON TRIAL.

The Railway Commission is to make a tour throughout the West for the purpose of hearing complaints as to transportation grievances, and looking generally into the railway situation with reference to the coming busy season of the fall and winter.

This is the most effective avenue possible to the impatient critics who have sought to find cause of offence in the doings or non-doings of the Commission. The Commission has a purpose, has already gone far toward its accomplishment, and is proceeding toward its completion in a most rational and practical manner.

The proposed tour of the commission puts it up to the business men, the coal miners, the farmers, and the people of the West generally to make good the charges they have freely launched against the railway companies, particularly during the winter. They will have an opportunity of doing so conveniently, and should be that they make the most of the opportunity.

It must be remembered that the Commission is governed by the explicit evidence placed before it, and not by common guess and hearsay. Its hearings are conducted somewhat in the manner of court sessions. The plain folk must make a definite statement of his grievance and the party accused has an opportunity meeting the accusation.

The railway companies will be represented before the Commission—that may be relied on. They expect something to be coming their way at this juncture, and will be prepared to meet it. Their best legal talent will be on the ground to protect their interests, to minimize the seriousness of the charges brought against them, and to endeavor by all legitimate means to influence the Commission against making any stringent demands upon them for the speedy settlement of conditions.

All the more reason, therefore, that the public grievances should be for malated and prepared beforehand for presentation to the Commission in the most impressive manner. That the newspapers a few months ago were filled with denunciations of the inefficient service should not be relied upon to make a sufficient impression on the situation on the Commission. In some instances, the allegations are known to have been exaggerated; in others they were general and sweeping rather than specific and direct, and courts do not rely on exaggerated or general assertions or representations.

The Commission comes looking for information, exact, concrete and ample information, as to the traffic conditions in the West. The railway companies will see that they secure half of this information—the half that reveals the difficulty of operating railways in severe weather, and of building and equipping lines far enough to keep abreast of the country's development. The other and larger part of the information is readily available, and it is up to the people to see that it is presented. Abundant examples can be secured in every western town to illustrate the paralysis of freight and passenger traffic during the winter, but unless there is concerted, organized effort the most glaring instances may not be presented, and will certainly not be presented as advantageously as they should be.

To present and present the public side of the case will require time, energy and intelligence, and possibly some outlay of money for advocates' fees. All these will be well spent if the case is well made. But if it is not made out a good case now, we will throw away the opportunity of a life-time. The aggregate evidence of inefficiency available in the West, if properly arranged and presented to the Commission goes from city to city, should build up and establish a case that the integrity of the corporation lawyers and the consistency of the railway managers should not be able to overthrow or even disguise.

Here is a rare opportunity for the Western Boards of Trade to get in

splendid work of a kind, for which they are admirably adapted, and it is a rare opportunity for bringing into play the co-operative power of the Associated Boards. Nearly every Board has a secretary and an organization readily available to take up the work, to collect evidence, arrange for sessions of the Commission, to secure the attendance of witnesses, and generally conduct the campaign, and by reason of their Association, the Boards should be able to co-operate in such manner that the case presented at the various sessions from the Great Lakes to the Mountains would complement and support each other.

The West is on trial in this matter. A few months ago we were beseeching the Railway Commission, the Government, Parliament, and all and sundry to come to our rescue from the consequences of the wretched income of our railways. It is up to us to make good our claim that we needed relief. If we fail to do so, we need not wonder if our supplications, if not fall upon deaf ears, at least will be treated with contempt. And it may so happen that only a few months hence we will be in a plight something very similar to that of the past winter. If so, the fault will not be ours in having failed to present our case when we had the opportunity.

THOROUGHLY CHARACTERISTIC

The Calgary Alberta devoted one quarter of its front page and a three column heading on Saturday to a somewhat lurid article copied from the Strathcona Chronicle, informing the public that the "Palmont Fair Was a Mammoth Presumption." That the Chronicle would "knock" the Fair was to be supposed, and that one or other of the Calgary papers could give publicity to the accusation was also to be expected. The Alberta appears to have out-heralded the Herald in this instance.

In doing so the Alberta only exemplifies the broad spirit of unbecoming malice which for a generation has animated an element of that city toward Edmonton and all the provinces of Calgary. Twenty-four years ago the Bulletin published the following paragraph which sufficiently reveals the chivalrous sentiments which a portion of Calgary's population ever then entertained toward the pioneer rival:

"L. Beaupre and his partner recently sold 150 head of a band of British Columbia horses at \$7 apiece to Capt. Stewart. The horses were suitable for farm work, and were intended to be brought to Edmonton, but at Calgary Beaupre's partner was informed that there were only a lot of Shagbump horses at Edmonton who were unable to pay for anything, and he declined to come through."

The Alberta now tries to assure us with the unquestionable evidence of circumstance how little of calumny, honor or courtesy the rolling ears have brought to this element to whose prejudice it panders.

The point worth remembering is that such malice reveals the very from which it springs. The press of one city does not assail another city, whose rivalry it does not feel that it has cause to fear. The public under stand this, and Edmonton may rest secure that the rabies of its enemies will only serve to fix in the public mind how thoroughly this city envied by its contemporaries. The longer this spirit abides and the more frequently and furiously it breaks forth, the better for Edmonton.

ON THE SIDE.

Mayor Schultz, of San Francisco has been elected for a five year term.

Lipton will challenge for the American title. There is nothing like persistent advertising.

That Hague Conference looks wonky like a stand-patter convention.

Another wife of the late Lord Bessborough has been visiting America. The Admiral's brother should have visited America years ago.

English passengers who arrived in New York complained that their susceptibilities had been wounded by the Fourth of July eruptions of American passengers. Another argument for the All-Red line.

Hygienists who delight in raising acids against popular beliefs, are now tilting against strawberries. These are accused of having a bad effect upon the tempers of their eaters, who, it is alleged, become sulky and irritable after eating them. This, at least, is the contention in a season when the strawberry costs about 20 cents per small.

Enormous caves have been found in the sandstone rock underneath a portion of Minneapolis. What splendid places for the city council to hold secret sessions.

The Winnipeg Telegram says Mr. Kyleworth is introducing "cynical casuistry" into politics. If some one would only introduce the Telegram to enough of the same community to explain away the Woods sawoff, the organ would grind a merrier tune.

## PREPARE CHILD FOR LIFE WORK

Teach Him to Forego Pittance of Today For Higher Things Later

Montreal, July 9.—Premature also rules the child of the years and specifically for education," said Jean R. Lavoie, secretary of the annual child labor committee of New York, in addressing the American Institute of Instruction.

The keynote of his address was the link which the child must carry through life as the result of too early start as a wage earner. "He enters industry too young," he said, "to undertake the more intricate and rewarding forms of labor. A child of anything in modern industry which can be dignified by the word 'apprenticeship' is a simple case. For every year, some simple task, which frequently calls into requisition but a few muscles and no technical development. A report recently published in Massachusetts shows that the child who begins work at 12 or 14 years of age compared with one who remains in school until 16 is permanently handicapped in the natural course of a life."

"Should Fight For Labor." "We cannot omit from our educational processes the fitting of a child as an economic factor in society. The majority of our children are destined to earn their living in some form of what society needs—productive manual labor. In aiming directly to serve the majority of its patrons, rather than leading the chief element in an attempt to pick out of 100 children one child who may become a future president or a captain of industry, our schools will add immeasurably to the wealth and joy of the majority, at the same time rendering direct service to the child and future citizen who is believed to lack very schoolroom."

Many of our children are taught to be heirs of ancient Greece and Rome and the chivalry of the middle ages, but the physical geography of the continents, but as to the dominant industries in their own community, and why they are dominant, and whether there would be an industry in making a change, how much as they taught of this? The dominant industry in many a town simply gulls generation after generation of the people, primarily because they are unaware that there is any other way to maintain life than by being themselves.

"Keep Child in School." "Our present system of the one-sided, restrictive laws as shall strictly prohibit the little child from outside of industry and bring him within the range of the school, and on the other hand, an educational programme which will afford such occupation and relaxation that he will not leave school will only an education which prepares for a child for self-supporting industry, an education which the parent will recognize as preparation for higher wage earning, and which will inspire him with sufficient patience to forgo the pittance of today for the higher rewards of tomorrow."

## \$670,000,000 FOR UNCLE SAM

Treasury Department Figures  
For Fiscal Year Show Un-  
exampled Prosperity

Washington, July 9.—Uncle Sam has enjoyed great prosperity during the fiscal year ending June 30, 1927, with the Treasury Department figures showing that the government has received \$670,000,000 more than it has ever before, and that its expenditures have been less than at any time in its history.

**Fattest of All Years.**  
This revenue of \$670,000,000 is the largest on record, being more than \$70,000,000 in excess of the record last year. The expenditures have not grown at a corresponding rate and will not exceed those of last year by more than \$10,000,000, according to the bills during the year have totaled about \$680,000,000, so that he will have a balance of something like \$100,000,000 on the right side of the ledger.

Last year's customs receipts, which were \$272,000,000, established a record and the fact that during the present year customs receipts have exceeded all previous records by about \$30,000,000, will furnish argument for a revision of the tariff schedules to prevent the unnecessary accumulation of money in the treasury in excess of expenses. Unless the country grows less prosperous during the fiscal year, a month a decided decrease is shown in the rate of growth of imports the

question of getting the money which comes in the form of customs receipts into circulation will be a problem to worry the Secretary of the Treasury.

### Has All Kinds of Money.

While the revenues have exceeded the expenses during the year by about \$200,000,000 the working cash balance in the treasury is approximately \$75,000,000, aside from the gold reserve fund of \$100,000,000, the government's general fund consists of \$10,000,000 gold coin and bullion, \$75,000,000 gold certificates, \$4,000,000 United States notes, \$3,500,000 United States notes, \$12,500,000 national bank notes, \$5,000,000 subsidiary silver coin and \$1,000,000 subsidiary silver coins. The government has in national bank deposits \$182,000,000, and in the Philippines \$12,000,000, or more than \$180,000,000, added to the \$100,000,000 in the general fund.

Out of this grand total of more than \$300,000,000 the government must pay liabilities in the form of outstanding checks and warrants, national bank five per cent fund, clearing office balances, etc., to the amount of \$111,000,000, leaving an available cash balance of \$200,000,000, of which at least \$100,000,000 is a working balance, free from encumbrances, to which any purposes as Congress may designate.

### Other Record Made.

While the government has never before received so much money in so short a time, it is only measure, in most respects, of the prosperity of the country. The government, in addition to its wonderful growth in receipts, has another exhibit to offer to demonstrate that the prosperity it has enjoyed is well founded. The value of imports during the fiscal year will approximate a billion and a half dollars, while the exports will exceed in value the imports by about \$100,000,000. The value of imports during the previous fiscal year was \$1,229,362,446

and of exports, \$1,743,944,500.

While the official data are not available for a statement of the export value of our commerce last year, the returns clearly show that the fiscal year ending June 30, 1927, will surpass by \$225,000,000 the value of the exports during the previous year, while the exports will be something like \$100,000,000 greater in value.

### Big Increase in Deposits.

Another demonstration of a prosperous year is furnished by the compendium of the currency, which presents statistics showing that the national banks are increasing in number, assets, resources, and that the individual deposits are an excellent barometer of the public's participation in the good times, shows a remarkable growth. The 6,429 national banks in their last report reported to the controller of the currency assets and deposits amounting to \$4,611,451,000, an increase of \$424,250,000 during the year, the number of banks having increased from 6,053. The banks held \$3,537,130,000 in specie, an increase of \$44,726,000, legal tender notes \$100,877,220, a decrease of \$4,500,108; capital stock \$885,000,917, an increase of \$22,261,122; surplus and other funds \$720,413,138, an increase of \$50,240,670; circulation \$347,918,008, an increase of \$37,057,270; individual deposits \$4,322,800,411, an increase of \$271,204, and of resources \$8,676,201,434, an increase of \$950,273,281.

While it is shown that loans and discounts of national banks have grown faster than individual deposits, it should be stated that the \$4,611,451,000 in assets and deposits are only \$14,600,000 in excess of deposits, with the capital stock, surplus and other funds, the total assets of the banks amount to \$10,044,103,000, a simple proportion, it is asserted for the department.

### CALL MONEY.

New York, N.Y., July 8.—Money on call, firm; highest at 1-2 per cent; lowest at 1/4 per cent. Time loans: 60 days, 3-4 per cent; 90 days, 3-4 per cent; 120 days, 3-4 per cent; 180 days, 3-4 per cent; 240 days, 3-4 per cent; 360 days, 3-4 per cent.

## HE MURDERED HIS BROTHER

Michelle Sylvestri Arrested in  
Montreal and Confesses  
to Deed

Montreal, July 8.—Michelle Sylvestri, of Providence, R.I., was arrested here on a charge of having murdered her brother, Joseph, on June 24, 1924, by stabbing him to the heart with a screw-driver. Sylvestri was recognized by a Providence man in Montreal, who communicated with Chief Carpenter. The chief, after getting into touch with the Providence authorities, made the arrest last night, when the accused confessed of his guilt to four detective. Sylvestri was driven into custody by months of nagging by his brother, and that on the day of the murder his brother had drunk him with an iron bar. He then related the murder of his brother, and Sylvestri, "repudiated his confession and stated that his only brother died in Italy."

### Distinguished Canadian Dead.

Quebec, July 9.—There has recently died in England one of the foremost mathematical geniuses of his age, who, moreover, owned Canada as his birthplace. Edward John Routh was born at Quebec, Jan. 20, 1831, and was the son of Sir Randolph Routh, who had married an English noble. Marie Louise, daughter of Judge Taché, and sister of the late Cardinal Taché, was Routh's wife. Routh himself was the son of Richard Routh, chief justice of Newfoundland, and had a distinguished career in the army.

Edward Routh spent his boyhood at Quebec, and on the return of the family to England attended Trinity college, London, from which he in time proceeded to Peterhouse,

Cambridge. He had an exceptionally brilliant career as a student, for in 1850 he won the double honor of being senior wrangler and Smith's prizeman. At a later date he won the Adams prize and he also carried off the gold medal in the University of London. He declined to enter the educational profession and met with success from the very first till at the time of his retirement he was renowned as the foremost of mathematical coaches.

### MANY JAPANESE COMING.

To British Columbia, According to  
Cable Advice.

Vancouver, July 9.—A Japanese invasion of British Columbia is being planned. A cablegram from Honolulu under yesterday's date says arrangements are now being made to charter steamships, each of which will carry 2,000 Japanese from Honolulu to Victoria and Vancouver, British Columbia. The Kumeric was the first of the steamers to be taken for the trip, and at last advice from the Hawaiian Islands over 1,500 tickets had been sold to Japanese passengers, to this port by the big West steamer, which is of 3,350 tons. The Kumeric, which loaded a large number of Portuguese for the Hawaiian sugar plantations, was chartered by syndicate of Japanese trading-house keepers of Honolulu for the run to Victoria, \$20,000 being paid as charter money for the trip. The Japanese are charging their company \$10 fare for the voyage to Vancouver. Several large steamers are on the way to Honolulu with coal from Newcastle, N.S.W.

The Japanese are charging their company \$10 fare for the voyage to Vancouver. Several large steamers are on the way to Honolulu with coal from Newcastle, N.S.W.

### Life Prisoner Released.

Kingston, July 9.—There has been released from the penitentiary here a life-prisoner named Alexander Gillis, who has been for the past twenty-two years within prison walls. In the year 1883 Gillis murdered a man in Nova Scotia, striking him on the head with a rolling pin. He was sentenced to be hanged, but later the sentence was commuted to life imprisonment.

## WINE GROWERS IN UGLY MOOD

Arrests and Wine Frauds Law  
Have Reinfatined People in  
South of France

Paris, July 8.—Despatches from the south of France today report that the situation is again growing serious. The dissatisfaction with the new wine frauds law and the supplementary measures now under consideration by parliament, together with the arrest of thirty persons suspected of complicity in the burning of the prefecture at Narbonne, have reinfatined the people. The mayors and other municipal officials are holding meetings and have decided to resign their offices unless the arrested persons are released. The troops are withdrawn and the wine frauds bill is modified. General Baillou, a commander of the troops to preserve order and all the troops of the disturbed region have been confined to the barracks.

### Death of William Frank.

Brantford, Ont., July 8.—William Frank, formerly tax collector here, but for the past three years retired, died today.

### WINNIEP STOCK MARKET.

Winnipeg, July 8.—Prices on the local market yesterday were:  
Hogs—Live select, per cwt., \$7.75; heavy, per cwt., \$7.75; stags and sows, per cwt., \$7.75.

### WINNIEP WHEAT PRICES.

Winnipeg, July 8.—Cash wheat, No. 1 Hard \$3.14; No. 1 Northern \$3.14; No. 2 Northern \$3.14; No. 3 Northern \$3.14; No. 4 Northern \$3.14; No. 5 Northern \$3.14; No. 6 Northern \$3.14; No. 7 Northern \$3.14; No. 8 Northern \$3.14; No. 9 Northern \$3.14; No. 10 Northern \$3.14.

**EVIDENCE WAS****NOT ALLOWED**

Haywood Defense Tried to Put in Evidence to Show Manufactured State Evidence

Boise, Idaho, July 9.—The defense in the Summerville murder case today charged that Detective James McPartland had been guilty of an attempt to manufacture testimony against W. D. Haywood, but was unsuccessful in getting the basis and details of the charges before the court and jury. Alva A. Swain, a newspaper correspondent, who represents the Pueblo, Colorado at Denver, was called to the stand and questioned as to a conversation he had with Detective McPartland last fall. McPartland, for the state, objected to the conversation, on the grounds that no foundation had been laid for it. Clarence Barrow, for the defense, explained that the testimony was offered for the purpose of showing that there existed a conspiracy between the mine owners and the Pinkertons to secure a conviction and the execution of the prisoners.

McPartland admitted this, will now, in an attempt to manufacture testimony, he declared, and I have now a right to show it. Judge Wood said there was nothing in the evidence that warranted proper foundation for the introduction of such testimony, and sustained the state's objection. The defense took an exception, and said they would later make another attempt to secure the admission of Swain's testimony. Counsel for the defense evidently count on reaching the matter through McPartland's testimony, but it is quite probable that the state will not let McPartland as a witness.

**Swain's Story.**

It is claimed by the defense that McPartland told Swain that he had let letter from Harry Orchard saying that when Haywood paid him to kill the Viaducter he took him to one of Denver banks to draw money, and that when they came out of the bank Swain was standing at the door and saw them. It is said that Swain told McPartland that he could not remember the incident. Whereupon McPartland impressed him with the importance of it as evidence, and suggested a bribe to recall it, and became a witness in the case. Detective McPartland denies that he ever suggested anything improper to Swain. He says he put the letter as described by Orchard, who wrote that Swain was at the door of the bank and that he believed Swain might remember seeing him. He says that when he went to see Swain the latter said that he would not tell whether he remembered the incident or not and asked for another interview. McPartland declares that he there dropped the matter and did not again see Swain.

**Showing Cause for Murder.**

Alva F. Gill, forensic master mechanic of the Tiger and Poor Man Mine, and later city engineer of Spokane, and his wife, Mrs. Gill, were also witnesses for the defense today. They joined relatives that Harry Orchard attempted to kill them in the Hercules Mine in February and March, 1906, which was just prior to his departure from the Coeur d'Alene, and Mr. Gill who saw Orchard in Spokane a month before he killed Summerville, testified that Orchard said that it was because of Stuenkelberg that he lost his interest in the Hercules mine.

**"Fricke Depositions."**

Other than for the interest and for the relief afforded by the introduction of these witnesses named, the entire day was given over to the reading of the rest of the San Francisco depositions. The man who built the Laidlaw Flats, the planter who put in the lighting system, the fireman who came after the explosion and the contractors and the men who repaired the mine all deposed at great length and detail. The weight of their tales seem to favor the state's position, but none of the testimony was conclusive, and the whole question will be fought before and decided by the jury. The last of the depositions knew Harry Orchard, and from him heard the story of the Hercules Mine with the usual threat that he was going to "fix Stuenkelberg" for driving him out of the country.

**Meyer To Testify.**

Charles S. Meyer, president of the Western Federation of Miners, will be brought from the county jail tomorrow to give testimony in behalf of his co-defendant. It is expected that he will be called shortly after ten o'clock and he will take about all the rest of the day for both sides to complete their examination of him. He may finish in time to permit the calling of Haywood, but the chances are that the defense will close its arrangements to call him Thursday morning, rather than at the close of a trying day.

**Few Spectators Present.**

There were few spectators in the court room when the trial was resumed today. The day began with a continuation of the testimony of J. J. Reilly, who lived near the Bradley participants. Reilly declared he had passed the apartment but a few minutes before the explosion and saw a Japanese servant descend the steps and vestibule. He did not believe it was within the range of possibility for any one to have placed a bomb there in the manner indicated by Orchard in the time which elapsed between his passing and the result of the explosion. The next deposition taken up was that of Mrs. Charles Reilly, who, as Mrs. Crow, had been employed by the Bradleys as cook. She told of having employed gas in the house for several days prior to the explosion, and had called up the gas company to complain of it. Mrs. Crow denied absolutely that she had gone to the theatre with Orchard as he had testified.

**ENGLISHMEN****WEAR SMALL HATS**

Average Mental Capacity on the Wane, Says Eminent Physician

London, July 9.—The average mental capacity of Englishmen is on the wane according to Sir James Barr, an eminent physician, who is president of the Liverpool Medical Institute, and holder of other prominent medical posts. He says: "One of the largest lunatic asylums in the United Kingdom told me that the average size of hats had diminished during the last half century a full size. A big diminution of this kind in the national brain-box is a matter to give us pause."

Dr. Barr was addressing the Royal Institute of Public Health, now holding its annual congress at Douglas, May. He was not at all pleased with his countrymen. The money they were spending in the treatment of disease, he declared, ought to be directed to the preservation of health. Then the necessity for surgeons and physicians would largely disappear. People were only now beginning to awaken to a lively sense of the value of health, and were beginning to cease to blame Providence for the incidence of disease. Denouncing the sickly sentimentality of a certain type of Christian, who had no faith in robust manhood, he urged some process of artificial selection in the human race. He had often heard miserable little specimens of humanity flitting upon the value of total abstinence. It was a pity such men were not still born. Let them inspire the race, he said, and the world would be instructed by men, not by monkeys.

A nation's health was its most valuable asset. The nation which would produce the finest race of men in the long run. He would like to see every British man over the age of 20 and 60 instructed in military exercises to develop physical and moral grit. A nation of sentimentalists, with a tendency to sentimentalism, was a military spirit, but was not started by military men, but by politicians, low-down financiers and some newspaper editors, who never did any fighting. The nation would be well rid of them. Detailing schemes for the preservation of health and confidence in the future, Dr. Barr said if we had less count and hypocrisy about us, "The Lord giveth and the Lord taketh away." It would be better for the nation.

**NO TELEGRAPH COMBINE U.S.**

Two Big Companies in Bitter Competition Says Mackay

New York, July 9.—Clarence Mackay, president of the Postal Telegraph Cable company, declared today that "all the talk about the Western Union and the Postal Telegraph Cable Co. working in harmony is nonsense. If two companies ever competed in the world, these two companies are competing, and the competition is fierce and bitter."

Mr. Mackay's statements were made in commenting upon the action of Attorney General C. E. Jackson, of New York, who yesterday asked a justice of the New York Supreme court to appoint a referee to secure evidence that the Western Union and Postal companies were in fact in a combination to restrain of competition.

**Companies Competing Fiercely.** Mr. Mackay said that if two companies ever competed in the United States, these two telegraph companies are competing, and always have been. At times, the competition is even fiercer and bitter. Every merchant and manufacturer in the United States, wherever we reach, will bear witness to the truth of this statement. We are negotiating with the Western Union all over the country in regard to railroads right or wrong. In fact, the tremendous fight between the Pennsylvania railroad and the Western Union was due solely to the fact that we got that business away from the Western Union.

"The Western Union is trying to exclude us from all Union depots, and have succeeded in excluding us from the Birmingham Union depot, which is, perhaps, the finest Union depot in this country at present. We intend to take that matter into the courts to set aside the monopolistic contract between the Birmingham Union depot and the Western Union."

Postal Company's New Western Union depot is a fine building, with cable to Cuba, which the Postal company is now trying to tie to Atlantic cables, land lines, and a new route which, he said, the company is about to construct through the Nevada gold fields to the Pacific coast, as evidence of that company's competition with the Western Union.

He added: "We are the only company that ever did really compete with the Western Union and succeeded in doing so. All this talk about two companies working in harmony is nonsense."

## AROUND THE CITY

### LOCALS.

The executive of the Liberal association meets tonight in the Young Liberal clubhouse.

Construction work on the new Y. M. C. A. building is being pushed rapidly forward. The brickwork for the first story is now complete.

Headley Howard of Norwood School, who has been named as the promotion lute, passed from standard II to standard III, ranking second in his class.

After a short illness, Mrs. John Pullen died of heart failure at the Public Hospital last evening. Mr. and Mrs. McCoppin took charge of the body, which will be sent to Multnomah, Man, for interment.

H. C. Taylor, Grand Master, and Dr. C. H. Stuart, Grand Secretary of the Grand Lodge of Masons for Alberta, left this morning for Vegreville and Vermilion, where they will consecrate two new lodges.

Mrs. W. A. Deyl, 138 Bellamy street, will entertain the members of Edmonton Bive, No. 1, Ladies of the Macraebos, on Thursday afternoon, July 12th, also any members of other lodges who happen to be in the city.

W. J. Bellage, who was sent up to the Supreme Court for trial in connection with the Horse Hills farmers' charges of misappropriating money, has been released on bail to appear on the 20th, when a special session of the Supreme Court will be held.

A wire was received from Montreal this morning stating that the condition of adams McQuigley, who is dan- gerously ill in that city with typhoid fever, remained unchanged. This is the twenty-first day of his illness, and a change for the better or worse is expected.

The game to have been played to- night at the agricultural fair grounds, Strathcona, between Edmonton City Football Club and the Strathcona City team will not be played, as the grounds could not be obtained, owing to the late season. The date of the contest will be fixed later.

Mrs. Kenneth Kellock, of Fourth street, died yesterday afternoon at the Public Hospital, where she had been taken a few hours before in a serious emergency case. The funeral will take place tomorrow afternoon from the undertaking establishment of Muffat & McCoppin, Edmonton cemetery.

Ralph V. Bellamy, who has been attending Oxford University for the past three years as a Rhodes scholar from the west, is expected home about the beginning of August. Mr. Bellamy has just taken his degree at Oxford, is also a graduate of Mc- Master University, where he was considered one of the best all-around men in his class.

Mossie, Sparks, and Horensche, the young Britishmen who left Ed- monton about three weeks ago on a business trip from this city to the Gulf of Mexico, have been heard from at Bitterfield. The recent floods have caused them no inconvenience, and they are picking up plenty of material for the book they intend publish- ing concerning the trip.

### THE NEW FIRE FALLS.

It is understood that only the foundation of the new west end fire- hall will be completed this summer, the superstructure work being left over till next year.

The east end hall, however, will be finished on to completion at once and will, it is expected, be ready for oc- cupation by the end of September.

### NO INQUEST NECESSARY.

Coroner Dr. Bradstreet has decid- ed that owing to unobstant evidence of suicide it is unnecessary to hold an inquest on the body of Andrew Onda, found at the foot of the bank below the Hudson's Bay fort. The body will consequently be buried this afternoon.

Onda had been undergoing treat- ment at the Macraebos Hospital for some time but disappeared on July 2nd, on which date it is supposed he suicided. For some time previous he had been weak minded, though not pronounced insane.

Onda came from Ladue, where he now has a brother residing.

### OTTAWA "OLD BOYS."

The Federal Capital is putting forth every effort to make a huge success of the grand reunion of Ottawians from July 27 to August 5. A splendid series of sporting events has been arranged. The Cause Club, regulars, is only one of many including an afternoon of hur- dles, horse races, regatta, etc.

A Venetian night, for which the river and canal and beautiful side of the city were equipped, will draw out thousands of thousands in procession. Cham- pionship matches of lacrosse and other games are on the programme side by side with elaborate military and agri- cultural parades.

Cheap rates are being given by all the railroads for the event.

### BUILDING PERMITS.

At the office of the building inspec- tor this morning R. W. Hill took out a permit for a \$10,000 remodeling house on Fraser avenue, a few feet south of the Waverly, which he erected last summer. The building will have a full basement, will be three stories high and will have about thirty rooms.

Other permits issued by the inspec- tor were as follows:

Thomas Asar, Eighth, dwelling,

Dr. Harwood, Fourteenth, dwelling,

### AT THE POLICE COURT.

This was a quiet morning at the police court, in contrast to the past few days, during which a number of cases have engaged the attention of Magistrate Cowan and Wade. This morning only one case was heard, and was let off with a \$5 fine, despite the fact that he was on the same charge only two or three days ago.

Yesterday afternoon, the case of two Russians, Bilan and Sowa, was heard. The latter is a Russian, and the former a Vegreville farmer, claim same. Former is being unable to speak English secured Sowa as interpreter. After making some purchases in the store of J. H. Morris & Co., he claims that he left \$20 on the counter when going out, but when he returned it had disappeared. With him at the time was the interpreter, who, according to the evidence of the complainant, subsequently having made his bid and come good to an alleged confidence in the International Hotel.

Magistrate Wade, who heard the case, held the evidence was not sufficiently strong for commitment, and Mr. Morris and others were also ap- peared.

John King appeared for the prosecution, and H. H. Robertson for the defence.

Frank Mikota, arrested on suspicion of having shot Charles Somers, has been remanded till July 12th.

Judgment will be given next Friday at 2 p.m. in the case against Louis Gault, the German charged with having interfered with Officer Griffith in the arrest of Paulie Steiner several weeks ago.

At yesterday afternoon's hearing of the charges in connection with the statement that City Detective Griffith was not sober at the time he made a report, a number of witnesses in relation were heard. They included Detective Griffith himself, the chief of police, several of the officers and Solicitor Robertson, all of whom ascertained that he was on duty the evening and was perfectly sober. The magistrate also said that he had seen
